Position. Storage. **Movement**

Engineered to optimise space, overcome logistical challenges, and enable point-of-use disposal, the Daniels suite of clinical products and accessories are designed as an end-to-end solution, providing safe and seamless transitions between different work environments and applications.

The three signature designs exclusive to Daniels Health which enable logistical versatility and space optimisation are the Daniels peg system, mounting bracket and rail locks. These three systems form the genesis of all our accessory designs.

Daniels Peg System

Mounting Bracket

Rail Locks

Our interchangeable SharpSmart & Accessory systems are designed not only to achieve optimum versatility but also to champion safe handling for hospital staff and reduce the risk of infection. All of our mounting and logistical accessories ensure that SharpSmart collectors are always suspended from the ground, and the maneuverability of our transport accessories take the risk out of waste handling.

The Daniels SharpSmart collector are not just a sharps waste receptacle, they are part of an engineered risk-averse solution that manages waste from cradle to grave with the highest safety and environmental standards ever evidenced in the medical industry.

Sharpsmart Mounting Options

The Daniels suite of bracketing and transportation accessories have been engineered to achieve maximum versatility, optimise space, and overcome logistical challenges within clinical environments. Designed with a small footprint to fit into space-restrictive areas, the Daniels trolleys and floorstands are fitted with a standard mounting bracket which gives optimum flexibility for point-of-use disposal and efficient movement of collectors.
