

Bio Bin — 106L

GREY BASE AND LID | MAX WEIGHT: 22KG

MAKING HEALTHCARE SAFER
SOINS DE SANTÉ PLUS SÉCURITAIRES

1

Open lid of reusable biomedical waste container.

2

If using a liner, install by folding over top edges. Fill with biomedical waste.

3

If not using a liner, fill with biomedical waste that is in tied/sealed bags only.

4

Insert filled sharp containers that are sealed and securely locked only.

5

Seal all liners by twisting and hand-tying into a single knot.

6

Close lid and securely store in waste collection area. **No liners should be hanging over the edge once the lid has been closed.**

7

Place white Daniels barcode label on the upper left hand side of the front of the Bio Bin.

8

Contact your local Daniels service location for a pick-up of your container.
